EDUCATION

| | |
|--|--|
| Tsinghua University <i>Ph.D. Student in Computer Science, Institute for Interdisciplinary Information Sciences</i> <i>Advisor: Prof. Jian Li</i> <ul style="list-style-type: none">Research Interests: <i>Machine Learning Theory, Large Language Models</i> | Aug. 2025 – Present Beijing, China |
| Shanghai Jiao Tong University <i>B.S. (Honors) in Mathematics and Applied Mathematics, Minor in Finance, Zhiyuan College</i> <i>Advisor: Prof. Zhenli Xu</i> <ul style="list-style-type: none">Major GPA: 90.80/100, 3.94/4.3Core Courses: Probability, Stochastic Processes, Econometrics, Foundations of Data Science, Numerical Analysis, Optimization Methods, Mathematical Programming, Numerical Methods for ODEs and PDEs | Aug. 2021 – June 2025 Shanghai, China |
| The Chinese University of Hong Kong <i>Exchange Student Junior Research Assistant, Department of Mathematics</i> <i>Advisor: Prof. Fenglei Fan</i> | Jan. 2024 – Sept. 2024 Hong Kong, China |

RESEARCH EXPERIENCE

| | |
|--|-----------------------|
| Scaling Limits of Infinitely Deep Neural Networks <i>Advisor: Prof. Fenglei Fan, The Chinese University of Hong Kong</i> <ul style="list-style-type: none">Established the theoretical framework of neural networks with infinite depth and finite width by weakly dependent random processes.Analyzed the Gaussian process behavior and neural tangent kernels of infinitely deep networks, and leveraged the ergodic theory to interpret the width-depth equivalence of neural networks. | Jan. 2024 – Aug. 2025 |
| Density-based Exploration Strategy for Scalable Bayesian Optimization <i>Advisor: Prof. Zhenli Xu, Shanghai Jiao Tong University</i> <ul style="list-style-type: none">Proposed the Bayesian optimization by kernel regression and density-based exploration (BOKE) algorithm, which generalized the count-based exploration to Bayesian optimization, and proved its global convergenceConducted experiments to verify its competitive performance in space-filling design and optimization. | Apr. 2024 – June 2025 |
| Monte-Carlo Tree Search in Continuous Action Spaces via Kernel Regression <i>Advisor: Prof. Zhenli Xu, Shanghai Jiao Tong University</i> <ul style="list-style-type: none">Proposed the BOKR-MCTS algorithm to leverage Monte-Carlo tree search into continuous state-action spaces.Conducted experiments to show its computational efficiency and competitive performance in online planning tasks. | Nov. 2022 – Apr. 2024 |

HONORS AND AWARDS

| | |
|--|-----------|
| Shanghai Outstanding Graduate (Top 1%) | June 2025 |
| Outstanding Bachelor Thesis Award , Shanghai Jiao Tong University (Top 1%) | June 2025 |
| Zhiyuan Distinguished Scholarship , Shanghai Jiao Tong University (30 winners annually) | June 2025 |
| Zhiyuan Outstanding Leader Scholarship , Shanghai Jiao Tong University (25 winners annually) | Dec. 2022 |
| A-class Academic Excellence Scholarship , Shanghai Jiao Tong University (Top 1%) | Dec. 2022 |
| Winning Prize in S.-T. Yau College Student Mathematics Contest, Appl. & Comp. Mathematics Track | May 2024 |
| Finalist Winner in Mathematical Contest in Modeling (Top 3% of 18000+ teams) | May 2024 |
| 1st Prize in Shanghai Region of Chinese Mathematics Competitions | Nov. 2023 |
| 1st Prize in Huashu Cup National Mathematical Contest in Modeling (solo winner) | Aug. 2023 |
| 1st Prize in Chinese High School Mathematics League | Oct. 2020 |

COURSE PROJECTS

Dendritic Computing with Bilinear Rules and Artificial Neural Networks Fall 2023

Topic Course III (95/100), lectured by Prof. Douglas Zhou

- Constructed bilinear rules of dendrite integration from theory to practice. Implemented artificial neural network models hLN and DBNN to fit real neuron data, and discussed the limitation of ANN’s parametric space.

Solving Differential Equations with Deep Learning Fall 2023

Foundations of Data Science (97/100), lectured by Prof. Xiaoqun Zhang and Prof. Zhi-Qin John Xu

- Implemented the framework of physics-informed neural network (PINN) for both direct and inverse problems. Analyzed the components of prediction error and improved them by incorporating more physics information.

Modeling and Optimization of Biological Transport Networks Spring 2023

Topic Course II (99/100), lectured by Prof. Dan Hu

- Analyzed the dynamics of the biological transport network. Implemented different optimization algorithms, and explained the entangled-network phenomenon of results based on the spectrum of the graph Laplacian matrix.

Computational Mean-field Optimal Control Spring 2023

Numerical Methods for ODEs and PDEs (96/100), lectured by Prof. Lei Li

- Studied a class of reaction-diffusion equation mean-field information dynamics. Implemented the primal-dual hybrid gradient algorithm to solve the concerned saddle point problem.

SKILLS

Programming Languages: Python, Matlab, C/C++

Toolkits: NumPy, SciPy, Sklearn, Skopt, Pandas, Statsmodels, PyTorch, Numba, CVXPY, COPT

| | |
|--|-------------|
| Leadership: Leadership Team Member, <i>Mathematical Modelling Association of SJTU</i> | 2022 – 2024 |
| Class President, <i>Zhiyuan College, Shanghai Jiao Tong University</i> | 2021 – 2023 |
